HELIOTRAINING.

Full Stack Web Development Pre-Work

Week #1 (6 hours)

- Read the "Beginner's Guide to Web Development" document from CodeSchool. http://courseware.codeschool.com/beginners_guide/CodeSchool-BeginnersGuideToWebDevelopment.pdf

- Register at freecodecamp.com and complete the following challenges:
  a. "Getting Started" (don't worry about using their chat rooms, but be sure to get yourself a GitHub account)
  b. Within the "Front End Development Certification" section complete:
     i. "HTML5 and CSS"

Week #2 (5 hours)

- Complete the "Responsive Design with Bootstrap" challenge within the "Front End Development Certification" section at freecodecamp.com

Week #3 (5 hours)

- Complete the first half of the "Basic JavaScript" challenge within the "Front End Development Certification" section at freecodecamp.com

Week #4 (5 hours)

- Complete the second half of the "Basic JavaScript" challenge within the "Front End Development Certification" section at freecodecamp.com

Week #5 and beyond

- Contact Helio Training for a subscription to www.pluralsight.com and www.codeschool.com. They have some good HTML, CSS, and JavaScript courses available. We will be using Git extensively throughout our Full Stack bootcamp, so you should at least complete this course: https://www.codeschool.com/courses/try-git
- With your Pluralsight/CodeSchool subscription I strongly recommend completing the JavaScript Road Trip parts 1-3 https://www.codeschool.com/courses/javascript-road-trip-part-1 and earning your completion badges for them.
- Then, proceed to ES2015: The Shape of JavaScript to Come https://www.codeschool.com/courses/es2015-the-shape-of-javascript-to-come as we will be using ES2015 as our standard JavaScript version throughout the bootcamp. This course also provides a nice badge you can earn and put into your LinkedIn profile.
